

dna license.

*and there be faith.
and there be truth.
and there be children.
and there be democracy.*

*This Software Product - **Dynamic Applications** - in all its variants -*

including, but not limited to:

Startup Product Manager, Startup Informer, Photovoltaic System, Water Supply, Apple Tree, Healthcare Simulations, Business Process Manager, App developer, Internet of Things developer, Wind Turbine, Smart Grid Simulations, Pyramid Simulations, 21st century Truck Driver, 21st century worldwide growth of Forest, Nature Simulations, Small Business Developments, Society Developments, Perfect Desire, Key Account Manager, Federal Press Agency, and The Reverse Experience

– documented on –

www.dynamic-applications.org

as Software Product as well as Product Documentation on our Website, have been created, designed and programmed, so are work and contribution of Martin Bernhardt, Founder of Dynamic Applications.

*This Software Product is provided to you as **Freeware and/or Shareware** under the Terms and Conditions of the **dna license**, under the AGB, Terms and Conditions (from 2020) of Dynamic Applications, published on www.dynamic-applications.org.*

*In case of question, the **dna license** that comes with Your Software Product shall be valid for that Software Product.*

Fair chances for all, Same rights for all, at your own responsibility.

Terms and Conditions.

*You may **copy and run the product** on your own personal computer,
You may **use the product** for your own purpose, on your own risk,*

provided that the software product as such remains unchanged, and its Info dialogue, the original copyright information, and this license are included. Freeware means that it's free to use and to benefit from for everyone, under the Terms and Conditions of this license.

Please note that this Software license contains additional information that may (or may not) be of high value to you. You can use our software on your own risk, under your own responsibility; however, should you plan to found your own business based on one of our calculations, we recommend you to read everything, closely.

The Dynamic Applications platform of software products is Freeware, where not otherwise stated, but not the all of it is Open Source. This is a grassroots democracy project. We'll publish ideas for interesting simulations on Twitter. We vote in online democracy. Then it is my task to build it, and then you can use it, free of charge. From there, we can all vote again if you want. And so, there is quite a difference between an Open Source Anomie, and a grassroots democracy.

Code is Law.

At Dynamic Applications, we support the beautiful variety of beings on this planet (Participation), so we are close and we have a lot of things in common. We respect the Open Source idea.

However, you may not modify the program's executable or dlls, neither modify or re-package the setup installer, without written permission from the author. You are invited to create a new Setup or ZIP archive that includes this software, and adds only Simulations you've saved from within the application. In being the Founder of Dynamic Applications, i'm representing their functionality with my own name. For this project the official source code shall be the result of online democracy voting.

We'd like to prevent cheap minor-quality derivatives of the Dynamic Applications platform, Adware and Spyware, intransparent formula systems, and unreliable calculations that could be resulting from having the code flutter around in various qualities.

We're not saying that everything is perfect, here, but they are as good as we are able to do them, and you are encouraged to send in any bug reports or desires that you may have. We'll look at them and fix what's possible, as soon as possible. Impossible things tend to take a little longer.

It's a work in Progress.

The technical concept is published in [The Desire Language Specification](#) on our website. Feel free to develop your very own approach of a System Dynamics - based projection software.

At Dynamic Applications, we're part of an International Network of people competing for the best product in the world. Much as it is at your own startup. And we're determined to use our chance, as when you look closely, we're not driven by profit.

Vision. Dedication. Passion. Challenges. Hard Work. Exceptional Price Calculation. our small success. then finally, years from now. outstanding performance.

In the ages of International Networks, small is the new big. We're Startups. We're utterly small. Our products, our services, are crap. chanceless, almost. We the people have just begun. But we got this one thing. We're driven by purpose. We're independent. We're determined. And we're fast. If someone comes up with a good idea, next day we'll have adapted our company. We don't have to ask anyone. There are thousands of free offerings in The Sharing Economy. And whenever we find one, we start using it for free. We benefit true excellence, and so, we pay for the best ones, only. We think global, but we act locally. We honor excellent hand's craftsmanship, where ever you are. We are feeding the workers. Best Vision. Dedicated Passion. Exceptional value for money. We just go ahead.

We start charging whenever people come up and require us to do extra work for them. We charge our customer orders simply by work time. The best-known approach.

And we're so thankful they called up one day, as have understood our continuous job application.

The good news is that to grow your business exponentially faster over time, you don't have to work exponentially harder over time. It's enough to be confident, continuously work as good as you can, and offer the best price you can make.

Transparency. Privacy Protection. and Participation. our values.

At Dynamic Applications, we follow the spirit of The Sharing Economy. In having a Laptop or PC, we are rich already. We cannot starve that easily. We are ahead of 4.000.000.000 people in this world. And we're using small business planners for our fine valued startup product calculation. We have started to build small Applications suitable for the poor, as well. For this purpose, our products come at a really good price. Through interactive ToolTips, they are fully self-explanatory. Transparency. You can operate them from a tent in the desert, as our products are gathering no data at all. Privacy Protection. And we're participative, in sharing our work with people from all over the world, under same conditions.

At Dynamic Applications, we are working for people all over the world. Supporting them, benefitting them, providing value for them, helping them on. As that's our new life. We the people make a wish come true.

..

We are crap. We are small.

Chances are our business is gonna be a Startup.

While our products may still be broken, we are working for a lifetime.

We are working for a lifetime of dedication, imagination, challenges, and passion.

Our promise? – well maybe, we're not going to be rich on the bank account.

We're going to be rich in our heart, before we finally die down.

And we have this one very message on our way.

At least i have tried to provide anything.

|

|

What a powerful message, won't you agree?

Until finally, our small boat on the oceans on this very earth shall fall over, and be sunken as well.

..

At Dynamic Applications, we're builders.

..

Usage Conditions.

*Due to the nature of **System Dynamics** being a Top-Down Approach for analysis and understanding of complex system behaviour, all parameters and formulas we use for product Simulations perform as sample configuration, only. We say everything is implemented as specified, and visible through the application's interactive ToolTips. Any requirement of adjustments to default formula or input parameters of our software will require an individual contract.*

Dynamic Applications are self-explanatory, and they'll calculate what the ToolTips say.

From September 2017, we support Load and Save of simulation models in our own variant of XMILE. A sophisticated file format that includes about any interesting feature from any popular simulation model in System Dynamics. „OASIS“, „XMILE“ and „XML Interchange Language for System Dynamics“ are trademarks of OASIS, the open standards consortium where the XMILE specification is owned and developed. XMILE is a copyrighted © work of OASIS Open. All rights reserved.

In a similar way, System Dynamics is supported - and lots of articles about it were published - by the System Dynamics Society, www.systemdynamics.org, a non-profit organization for the remembering of Jay W. Forrester. Jay Forrester was working with his team for MIT on World Model III, the very first simulation of our world in 21st century. Published by the Club of Rome for their popular book The Limits to Growth. Remember there's always time, so it helps us to understand. Just an overview, of what could be, of what would be, ahead of time.

At Dynamic Applications, we target understandability, and not super complexity, though.

Therefore, any missing feature from the XMILE file format has to be considered an Enhancement Request. What you can expect is that you can save a simulation model built within Dynamic Applications, and then you can load it back on the next day, and you can run it and it works fine. If it does not load again, you can report that as a bug. You can expect that Load and Save will work for simulation models that you've created with Dynamic Applications for up to 100 Input Values and 100 Target Formulas (42 altogether in the free version).

You can not report a wish as a bug. If it's not there, it's not a bug.

Also, you can probably make any formula in the world more or less specific. As part of our principles, we don't consider such Input Value and Target Formula corrections as a description of formal defect of our software. Formally spoken, as long as the software is working as presented, that kind of issues will be considered a Change Request.

So if you want a formula changed, you can change it yourself, and it should work, instantly.

Formally spoken, all of our products are simply game models. We do not claim that they fulfill any specific reason or meaning, they're just an implementation of our view on this world. Sending in your feedback and your own simulations is welcome.

We'll accept as description of defect any calculation error in our Equation Solver, the core of our solution. We're going to fix defects in the equation solver engine as soon as possible, as well fix reproducible crashes or defects in other parts of our software. Please don't fuzz with us about the automatic 2-digit rounding precision, we just do it this way. It's not relevant to look at future expectations in microscopic detail.

As with every winner in this world, there have to be a few losers as well.

It is forbidden to use our software for any military purpose, in a military project, within or to operate a nuclear power plant, it is forbidden to use our software to promote racism, and it is forbidden to use our software in any other circumstances that directly endanger the life of people. You agree to use anything we publish on your own risk. We do our work as good as possible, but there's always the chance of a mistake.

For everyone who finds this is just a Freeware so you don't have to care about what's forbidden, so we agree upon a license fee of **100 000 Euro**, for every person killed by weapon constructed with, connected 2, or operated directly by this software, to be paid towards the United Nations (UN).

This reflects on the min value of **100 000 €** per person life that we assume to be a defendable value before the Law, resulting from 4 €/day (bread and water), that's 100 €/month, 1440 €/year, and 100 000 Euro/Life.

Why do we have UN declaration of Human Rights, when it doesn't count where it's about your life. So that's our heritage, our cœur value. The cœur value of a man.

...

Declaring a Network of helping hands.

Such heritage shall then be granted to every one age, on a **12 x 10 € per Person per Year** base is, free of charge, shall 1 Din A4 page pro claimed arrive United Nations, UNHCR debt, New York, United States. From this money, they may take **10 €** to print a World Bank card upon. Doesn't even need a chip, such card. So do we have a World Bank or not. If we have, they should be able to warrant the value, or it's not a World Bank.

A universal basic income from the most ground value, 10 €, too few for any burglary, and Fraud to risk at all. Yes. That's 10 € per Person per Month, with no further obligation than just sending in your personal request, one per Person, once per Lifetime.

We consider that, shall enough people have applied for the budget, everything will be solved, handled with care, and implemented as specified by this license, shall the first 100 000 € have been assigned by Court.

Yes. At The United Nations UNHCR department, they have a good name to defend.

And shall be nothing towards all members of Dynamic Applications, except for the widow's rent, the orphan's food. We prefer not to take any additional money from these people. But their license to operate this software shall be void, lifetime. Formally, we hereby refer to art. 100 GG Abs. (2), art. 25 GG, art. 4 GG (1)(2) here in Germany, as well regarding **The Universal declaration of Human Rights** [UN 1948], (i) to (vi), (vi) to (xii). Warranted here your Formal Existence in Court, as well your right of Food, Home and Family.

Therefore, shall any one take your own Home, Faith, or Family away, declare you insane, mad or homeless without substantial proof or justification, or declare void your marriage, husband, wife, or your own

children's care, so shall you be defended with 25 000 Euro before Law. That's what we here agree upon as a reasonable self defense. Where missing, we have to agree on a mutual defense on a lower basis.

That's 1000 hours of your own life time, for example, at 25 Euro per hour, as it may be offered by any member, with no obligation but agreement of the other party. It shall be up to everyone to agree on efforts and refund in detail on a fair and even basis. So here we give a recommendation, than that we could spend all that money, self, having only one life to defend, self. We are no Lawmakers at Dynamic Applications.

That's for the public will to achieve, in a democratic society.

So may you bring these conditions before any Court, in for your own part representing We the people, defended by the license, AGB, Terms and Conditions of Dynamic Applications.

As you shall be seen hereby, as well, a person of value, signed.

Pacta sunt Servanda.

*At Dynamic Applications,
our values are Transparency, Privacy Protection, chance, and Participation.*

Shall any one of us defend the Promise of Dynamic Applications, shall any one be given food, chance, home and family, and be the lucky self, as well. So shall we try to change the world to better, altogether.

The attempt counts, here we say.

Keep in mind that no one shall be obligated to follow any of these predefined conditions, exactly. Instead, take what may serve you, and refer to it where you want, for your own purpose, on your own risk, on the Court of Justice of your Neighborhood, for your own defense.

However, shall you ever deny to help a person in need, so shall you accept under these conditions that people may be talking bad behind your back, about it. That's because you are no longer assumed to be an honorable man. By accepting this license, You hereby agree not to sue a person in court, ever, just for that. So that you've shown a minimum agreement to our values, before the Law.

To be respected as an honorable man, at Dynamic Applications, it shall be expected you were willing to serve one person on the planet by 1000 hours, self, a lifetime, minimum. So that you have not lived your life just on the people's back, completely. We think that's fair enough, demand.

Freeware developers also love to have our own belief in this world, you know.

Bug Bounty.

*From March 2020, in case you have filed in a valid bug report, you'll have qualified to be granted a five (5)-year license of Small Business Developments, our professional Business Model development environment. As well, you may freely choose for a payment of **25 Euro** cash, according to our AGB.*

We provide an Excel Table called Personal Task Priorities with the software. As part of our Todo list, it'll list any known bugs we're working on. If your issue has not yet been reported (is not listed there), and you provide a valid report, that shall certify you for the bonus program.

Please report one bug at a time, with a clear description of 1) the issue and 2) the desired behavior, so that we can clearly reproduce it step by step. A bug can only be reported on existing features that are broken in itself, or that are not working as documented. If a bug cannot be fixed, we may have to change the documentation, but then your bug report shall be considered valid for the bonus program.

Please note that we have got only one release line, so issues will only be fixed in the latest version.

*From July 2020, for Participants, that's respectable Ladies and Gentlemen of Dynamic Applications, from acquisition of Small Business Developments (25 €), we'll charge half price for our standard work under the AGB, Terms and Conditions of Dynamic Applications, for up to **1000 €** of acquisition value, for your very first work order, only. Others are going to be waiting in line. That's only valid once, and only for one person who requests, demands or at least mentions it, in Person. But you have my warranty on that. In the standard case, where no one else, I'll fulfil your request myself. It's a good worker sign.*

At Dynamic Applications, we're honest, upright, and relatively poor people.

As it's good tradition for all honorable workers, to day. But that's really up to everyone to decide for themselves. Now we can provide substantial work to support you well and good, even if you can only afford half standard price.

In case you're interested, print out our work order form today, fill in and describe clearly your Task's description, time, effort and purpose of work. Sign that and send it back to us via traditional postal mail order. Should it have been convincing, i'll sign it back. Now That's got you a valid contract.

2 weeks of work for the price of one week. As you can imagine, it's impossible to fulfil every possible work order on the spot, exactly. We'll try to do our best, as always, and call back on questions.

*Clarity of Task in a few, friendly words give best results and chances.
No answer, you better try again. We'll do our best. Let me know if you wish to work with us.*

It is my personal thank-you to all you contributors who are working intensively with the software. If we manage to fix a bug, a lot of people from all over the globe will benefit and be thankful for that.

Freeware Conditions.

*You may deploy any of our free Software Products on your own Website, or SocialMedia accounts **free of charge**, considered that the conditions of this dna license and our AGB are respected.*

You're welcome to share your customized simulation models on your own website for download, as long as they are free of charge, as well. This Software Product and its Setup package must be unchanged in itself.

You may package XML files you've saved from within the application with the software, though. We'll be happy to integrate your works with an original Setup for a small worktime fee, on request.

*You may offer our products in a Zip or in another common archive format, where unchanged. You may publish and sell our programs on CD, USB Stick or Print Magazine, for up to **25 Euro**, altogether.*

*You are invited to consider your free membership on Dynamic Applications, or to support us via acquisition of one of our Windows 10 Store Apps, from **99 ct**, or buy a product from our Website, or support us by other means. With the arrival of Dynamic Applications, we think that you should well be able to found your own business, and earn that much, even in year one. And any product is able to run all our Simulations.*

Should you not be able to make goods for one single Euro or equivalent in one year, we'll be glad to offer a free Startup Workshop on a Friday, and discuss proceedings free of charge, to help you on.

In case of specific requirements, support questions or help, feel free to contact us anytime.

Shareware Conditions, Business Conditions, Re-branding and Reseller Conditions.

License conditions for using Dynamic Applications in a Startup, Small Business or Project.

License conditions for selling your own simulation models on top of your own, re-branded product.

From 2018, we provide a general license model for customized or re-branded versions of the Dynamic Applications platform. It is intended for Startups and for Small Business Consultancies who wish develop specific simulation models on their own.

Dynamic Applications are free to use for private, personal use and free for 1-2-3 person Startups around the globe. Offering Dynamic Applications on your Website shall be free of charge, as long as you offer your own simulation models free of charge, as well.

*Using this software product in a company or organization of 4 or more persons will be **25 Euro** per User Installation per Year. Offering Dynamic Applications, whether original or re-branded, for commercial purposes will be **25 Euro** per User Installation per Year (Sales Flatrate).*

*Where not agreed upon, beforehand, this dna license shall remain part of the product, as declared with the Creative Commons (**cc-by-sa**) paradigm (creative commons, mention origin, share alike).*

For re-branding, you are welcome to place your logo, your banner, your menus or documentation, and to translate or create Dynamic Applications in your own language. As far as this may require customizations to the software, our price list from the Customer and IT Service Conditions page on our website will apply. As part of our principles, do-it-yourself parts are free.

*As part of our **Transparency** culture, we'll require to keep a minimum statement to remain in the info menu item, so that people can see it's reliable, as follows. You can see this as a quality reference.*

In case of specific requirements, support questions or help, feel free to contact us anytime.

Manufacturer:

Dynamic Applications

www.dynamic-applications.org

In case you bought a specific simulation model from a 3rd party consultancy, please refer to your vendor for any errors within the simulation model's formulas. We can not warrant what we have not created.

Our warranty shall be limited to the correct functionality of the equation solver as described in the docs. Our money-back warranty is limited to the total price that you've paid for Dynamic Applications (plus 25 Euro) in case we can't fix a bug within 4 weeks after reporting.

Generally spoken, our duties shall be limited by the Total Value of your acquisition, plus 25 Euro. Fair enough.

Perfect Desire is our Professional Business Model Development Environment. It includes the original Visual Studio 2017 PD v1.0 Source code in C#. It's exclusive to the Dynamic Applications website, for reasons of Transparency and integrity. In being the Founder, I am warranting its quality with my good name.

*You are not allowed to publish **Perfect Desire**, our professional product, for download on a website.*

***Small Business Developments** brings a one-year-license to create, adjust, and sell Simulation Models. Perfect Desire brings a lifetime license to create, adjust and sell Simulation Models (Sales Flatrate).*

*Finally, one word towards **Software Piracy**. well. Now are you an honest man, or not. We share the vision of a free Internet, so our Software shall stay free of charge in the basic version.*

*However, should we find out that you are selling Dynamic Applications, and you have not shared your basic license fee with us, or you have stolen our Sourcecode, or you have robbed one of our devices, your license fee shall be **76000 €** (seventy six thousand Euro) plus Tax, in Court. We think these conditions are fair enough, as considering our price range, there's a huge benefit for you, already. Most chances in life don't come by your door, twice.*

As we all have one life only, you better don't fool around with your own luck. It turns around from age 50, you know. At that point, there's good name created for yourself, or you are going to be seen a fool, as Neighbors and Family have made up their mind about you. So it's Honesty and Trust, then follows Reputation, Home and Family, a fair chance, and the well-balanced global license to consider. Finally, Relief. Honesty is the best policy.

So there's a difference between enjoying the free world, and disgracefully destroying other people's work, value, and chance.

*For sake of humanity, have you given your house and possessions, already, shall **1000 €** (one Thousand Euro) remain you. We also reserve the right to only partly charge the full penalty, in justified, reasonable cases.*

Welcome to The Federal Republic, Young Traveler, your rights are with (ref. art. 100 GG (2)). In becoming a respectful, honorable man this way, shall your child, your family remain with you.

Shall you not intend to steal intentionally our (intellectual) property though, there's nothing much to worry. Unless you touch our very chance, the good right shall remain with you to create your own Simulation Models, on your own behalf. So, above restrictions shall only apply on forfeiting other parts of this license.

For simplification, from March 2020, these Business Conditions shall also apply for publishing your simulations in the Dynamic Applications Web Store. So that it's pay-for-work-time there, as well.

For any online order, you are granted a 14-day right of retreat, so in that case you'll be fully refunded.

All in all, we consider Dynamic Applications to represent a very good value for money.

At Dynamic Applications, we have a tradition in offering exceptional business cases to our customers.

Disclaimer of Warranty. Limitation of Liability. Trademarks. General Rules.

This Software product has been tested intensively during development, and it has been installed on a large variety of computers. Nevertheless, no single person in the world is free of mistakes. Be aware that there could be issues or defects within or caused by application of this software product.

There is no warranty that this software is fit for any particular purpose. You are using this software for your own purpose, on your own risk.

Formally spoken, unless required by applicable law or agreed to in writing or within this very license, licensor provides the software product on an "AS IS" BASIS, without Warranties or Conditions of any kind, either express or implied, including, but not limited to, any warranties or conditions of Merchantability, Title, Non-Infringement, or Fitness for a particular purpose. You are solely responsible for determining the appropriateness of using or redistributing the software product, and assume any risks associated with your exercise or permissions under this license.

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law or agreed to in writing, shall any contributor be liable to you for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the software, including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such Contributor has been advised of the possibility of such damages.

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the software product and its production under the terms of these license conditions.

If one or multiple provisions (sentences, paragraphs, clauses or logical deductions) of this Agreement is or becomes illegal, invalid, illogical or unenforceable in any jurisdiction, that shall not affect:

- *validity or enforceability in that jurisdiction of any other provision of this Agreement; or*
- *validity or enforceability in other jurisdictions of that or another provision of this Agreement.*
- *we ask any Judge for interpretation of this license in the sense and meaning of the general idea.*

It is our intention to empower you, the user, to verify, understand, and parametrize our software, including model and purpose, to use them on your own behalf, and for the purpose of optimization of your business after verification. Our software is fully transparent in all its calculations by concept.

With the availability of Free Promo Codes within the Dynamic Idea and Roadmap competition, we empower everyone not only to test and verify the software's functionality, but also to rename, translate, correct, modify, create and enhance any of our simulation models to your own benefit.

Privacy Protection.

Dynamic Applications have been designed as traditional, standalone Windows 7 / 8 / 10 / 11 desktop client. So they work like a Pocket calculator, displaying all kinds of calculation Model Formula in (x/y/t) directly on your Notebook or Desktop PC. This concept works solely on your own PC and it does not require or support any remote Server connection.

You can be rest assured your Startup Business Calculation model is private and safe. We develop everything from the customer's perspective. It's your business. We respect that. Dynamic Applications are calculators.

Dynamic Applications are transferring no data at all. A special option "Perfect Privacy" is available in the Settings Menu that will even suppress Website and Documentation calls, so that no IP address is transferred in calling the Website as hosted by WordPress in the U.S.A.

No Spyware, No Adware, no data gathering, no Server behind you. Switch off your WiFi connection and check this out. Dynamic Applications are going to work on, undisturbed.

We want a professional, reliable solution for the professional business user, so we make our solutions offline-capable. So you can be rest assured and recover. Creativity in all the manifold of we the people, that's the beauty of the whole thing. Early morning of a standard day, full of hope.

When switching off your WiFi connection, on calling menu items that lead to the Website documentation, your Web Browser may open with an empty page, naturally. That's not a defect; there simply is no Internet connection. Apart from that, everything is going to work fine. Things that may refuse to work are online documentation, your Twitter account, and the update functionality.

Your interactive business planner keeps being productive. This is not a web-based interface, and so you'll never lose your business data this way. Our Formula Solver will keep running.

At Dynamic Applications, we support transparent machine calculations for the public, and privacy for the people. This way, we prove that all the machines and products we simulate have got a realistic business case, to everyone. We think that's an advantage from the customer's perspective.

You are invited to go the same way. As long as you calculate something, your privacy is fully protected. Nobody can find out about it. As soon as you save your simulation models and publish them on the Internet, they're transparent again. So that everyone can understand them, as well. It's a central part of our culture. Your culture is what defines your success over time.

In case you're purchasing Windows 10 Store Apps, they offer automated upgrades for our products. As we operate no Webserver of our own, we don't know much about how they do it. We presume that for every app that's in the store and every user, they just track the latest downloaded version. You hit one button if you want to update, and there you go. We recommend you ask Microsoft in case you have a problem with how they do it.

Your sourcecode is Yours, as far as it comes to Customer and IT Services directly for you, as well as what's produced from my thought ware, shall you may find it useful, use for any purpose, on your own risk.

However, we reserve the right to maintain a copy ourselves, so that we can build a small archive of past solutions, and won't have to recreate our own thoughts all the time.

This means that at Dynamic Applications, we also reserve a right to keep a copy of all Sourcecode created.

Finally, there are a few options in the Settings menu of each application. These options are stored in a local configuration file (user.config) in your personal folder's AppData directory, on your local Notebook or PC. That's used for settings like Window size, position, and whether to show ToolTips, or dark/light User Interface design.

None of even these small personal data preferences shall be sent back to Dynamic Applications, in the standard case. In the rare case of a bug report (defect) that's hard to reproduce though, we may ask you to send in your user.config file for inspection of the issue in question.

We keep our software small for the perfect user experience, even with a bad internet connection in a poor country, and it works on a laptop in the desert. Respect. That's why we are gathering no data at all.

At Dynamic Applications, we think poor people are important as well.

Support Conditions.

We accept as description of defect any relevant or serious error you may detect in the evaluation of the formula system, i.e. the general Equation Solver algorithm. Use a pocket calculator to verify our software, anytime, and you should get different results, please let us know. We'll do our best to get it fixed. This also applies to any crashes or serious malfunctions, should there ever be.

If there is any other issue with running the software, please see the following resources, and vote for your topic of interest. It's the desired way of requesting new features – a fair user competition.

We work from Top Votes. As well, we are no slaves, so we reserve the good right to work on other things.

A detailed description of the Dynamic Idea and Roadmap competition, designed to be a small proof-of-concept for an online democracy, is available on our Website.

This voting is not about money.

The list of favourite ideas and roadmap features shall be available for voting on Twitter.

- **@dynamic_idea** : simulation model idea voting.
- **@dynamic_qs** : bug, roadmap and feature voting.

Basically, we will develop new releases in voluntarily respecting the fancrowd user voting.

Support for Dynamic Applications (Q&A) shall be free of charge, as far as reasonable.

For detail requests, use our traditional Support Email: support@dynamic-applications.org.

Feedback, constructive criticism and serious complaints shall always be welcome.

Professional Support.

*From 2021, **Key Account Manager** shall represent the Support Network of Dynamic Applications.*

Key Account Manager. Honesty is best.

Professional Support by Dynamic Applications.

Here you can open up to one Support Ticket per Month, free of charge.

Unless solved, there's Unlimited Upgrades, with no more Payment required.

Rules are that the customer closes the Ticket, or our work is not finished, because the issue was not yet solved to the customer's satisfaction. Also, you can cancel your monthly Support fees anytime.

It is thereby expected that you clearly describe defect, reproduction, what's your required solution, and why's that gonna be better than before, in the general case. Apart from that, feel free to submit your personal questions about startups, business and finance. We'll answer them as good as possible.

*Materials, Office and Support documents are provided - where not otherwise stated - under the Creative Commons (**cc-by-sa**) license, a gain. Enter your own Name, your Logo in Top Right position on our Protocol Form and Work order Template, add what's required by Law in your Country, and feel free to have income, consulting from there.*

Finally, Work Order Form and Protocol Form are supplied in case of any official complaint, professional work order or requirement, as well as a 4-page User Survey on Customer's Opinion,

To be all fulfilled under the AGB, Terms and Conditions (from 2020) of Dynamic Applications.
